List of Publications

You can add your publications in the bibliography file (.bib) with the keyword mypub and they will be included in the publications list.

1. Hafez, O.S., Abouelfetouh, O.A., Mohamed, Y.O., et al., 2024, “Cyclic Memory: An Efficient Alternative to Ping-Pong Buffer for FMCW LiDAR Interleaving/De-Interleaving”, 2024 International Conference on Microelectronics (ICM), pp. 1–4.
2. Hafez, O.S., Abouelfetouh, O.A., Mohamed, Y.O., et al., 2025, “Cyclic memory: a low-latency, single-buffer technique for FMCW LiDAR interleaving/de-interleaving”, Analog Integrated Circuits and Signal Processing, Vol. 124, No. 3, p. 70.

Abstract

Write Your Thesis Abstract Here.

Chapter 1

Introduction

Usually, the first chapter of the thesis provides an introduction to the research work. Each chapter may start with an introductory paragraph right after its title to provide some information about its content.

1.1 Section Example

You can write in italic as follows *Italic text* You can write in bold as follows **bold text** You can start a new paragraph by leaving an empty line as follows.

New Paragraph starts here.

1.2 Another Section Example

There are three levels of headings in this template. Using the heading styles allows for automatic numbering of all sections and helps in automatically generating the table of contents.

1.2.1 Sub-Section 1 Example

1.2.1.1 Sub-Sub-Section 1 Example

You can add a new Nomenclature entry Description (Symbol) or speed of light (c) as follows `\newnom{Description}{Symbol}`. The Nomenclature entries will be listed in the Nomenclature section in the front matter. You can also insert an entry in the Nomenclature section without appearing in the text as follows `\nomenclature{Symbol}{Description}`.

Chapter 2

Literature Review

2.1 Introduction

References throughout the thesis are cited using a number between square brackets [#]. The default bibliography style used is CUFE included in files `cufe.bbx` and `cufe.bst` for BibLaTeX and BibTeX, respectively.

You can cite a source [1], two sources [2, 3], or multiple sources [4–6] at once. The references will appear in the references list at the end of your thesis by their citation order.

2.2 Related Work

Fusce adipiscing justo nec ante. Nullam in enim. Pellentesque felis orci, sagittis ac, malesuada et, facilisis in, ligula. Nunc non magna sit amet mi aliquam dictum. In mi. Curabitur sollicitudin justo sed quam. Aenean imperdiet. Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Donec lacinia nonummy lectus. Proin vel urna. Fusce sit amet orci ac magna iaculis pharetra. Duis sagittis massa in tellus. Aenean vel velit vel felis consectetur pharetra.

2.3 Summary

Vivamus vehicula leo a justo. Quisque nec augue. Morbi mauris wisi, aliquet vitae, dignissim eget, sollicitudin molestie, ligula. In dictum enim sit amet risus. Curabitur vitae velit eu diam rhoncus hendrerit. Vivamus ut elit. Praesent mattis ipsum quis turpis. Curabitur rhoncus neque eu dui. Etiam vitae magna. Nam ullamcorper. Praesent interdum bibendum magna. Quisque auctor aliquam dolor. Morbi eu lorem et est porttitor fermentum. Nunc egestas arcu at tortor varius viverra. Fusce eu nulla ut nulla interdum consectetur. Vestibulum gravida. Morbi mattis libero sed est.

Chapter 3

Figures, Tables, and Equations

You are free to use any font type and size within your figures and tables provided that they are clear enough to the reader. For large size tables, you may separate them into several pages. For large size figures that cannot be resized to fit an A4 size paper without the loss of clarity, you may use larger size papers provided that they are properly folded to the A4 size and firmly bonded with the rest of the thesis.

3.1 Location and Citation

Figures and tables should be included in the main text as close to the point of their introduction as possible.

3.2 Figures

The document class defines a set of commands to insert figures and tables. For a centered, non-floating figure, you can use `\gfigure{Caption}{Label}{Options}{File}`. You can add a figure that takes the whole text width as follows.

Figure 3.1: Text Width Figure Example

Also, you can add a figure that takes a specific width as a ratio of the whole text width as follows.

Figure 3.2: Half Text Width Figure Example

Also, you can add a figure with sub-figures as follows.

(a) Sub-Figure 1 Caption

(b) Sub-Figure 2 Caption

Figure 3.3: Figure With two Sub-Figures Example

You can make a rotated figure as follows:

The document class also defines set of commands for labels and references. You can label a figure using `\figlbl{Label}` and refer to it using `\figref{Label}`. For example, Fig. 3.1 is an example of a figure that takes the whole text width. you can also refer to the sub-figures as follows: Fig. 3.3a and Fig. 3.3b.

3.3 Tables

The document class also defines `hctable` enviroment for centered, non-floating tables. You can create tables as follows:

Table 3.1: Table Example

A	B	C	D
A	B	C	D
A	B	C	D
A	B	C	D
A	B	C	D
Multi Column option			
A	B	Multi Column option	

Also you can create a rotated table for comparison, for example:

Like figures, you can label tables using `\tablbl{Label}` and refer to them using `\tabref{Label}`. For example, Table 3.2 is an example of a rotated comparison table.

3.4 Equations

You can write an equation with a label using `\eqnlbl{Label}` and refer to it using `\eqnref{Label}` as Eq. 3.1 as follows:

$$\nabla \cdot \mathbf{B} = 0 \quad (3.1)$$

3.5 Other Cross-References

you can also label and refer to chapters, sections, and subsections using `\chlbl{Label}` and `\chref{Label}` for chapters, `\seclbl{Label}` and `\secref{Label}` for sections.

For example, Sec. 6.1 is an example of a section reference inside Chapter 6. The command `\chlbl{Label}` is not much useful as the chapter title is already included in the chapter command `Chapter[Label]{Chapter Heading}{Path to Chapter File}`, but it is provided for consistency with other labels and references. You can also label and refer to appendices using `\applbl{Label}` and `\appref{Label}`, respectively. Likewise, `\applbl{Label}` is not much useful as the appendix title is already included in the appendix command `\Appendix[Label]{Appendix Heading}{Path to Appendix File}`.

A solid blue rectangle occupies the upper two-thirds of the page. Centered within this rectangle is the text "Figure Example" in a white, serif font.
